LED Marking Lamp, 6 LEDs - 12V

A compact 12V LED side - marker lamp with 6 LEDs. Only 6.4 mm high and 96 mm long.

A compact 12V LED side-marker lamp with 6 LEDs. E-Approved and measure only 6.4 mm high and 96 mm long. Fitted with 0.5 meter cord.

The lamp is very universal and can be mounted on trailers, campers and your car for extra marking and indication light.

There are many copies of this lamp, and our experiences tells us that many of these models quickly become defective. The bullet points below clearly shows why this model is superior to the cheaper models:

- Rubber seals around the wires on the back
- Extra thick base, so it is not bent easily
- The glass has been glued securely on, with visible glue all around the base
- The LEDs are placed correctly in the lenses of the front glass

The lamp is also available for 24V.
