Cherry waterproof switch (SPST)-IP65

A nice switch with a rubber-cap that is waterproof (IP65). The switch is available as on/off button and as a push-on button.

A nice switch with a rubber-cap that is waterproof (IP65). The switch is available as on/off button and as a push-on button.

Push on means that the switch is only active as long as you keep a finger on the button. Are you not sure, what the difference is between on/off and push on, we recommend you to watch our demonstration video. You can find the video under the pictures on your right side.

- 6A-250 VAC
- 20A-14VDC
- 10A-28VDC

Cutout : 20,2mm
