12-24Vdc 1W LED Driver with a Dimmer, 350mA

A 12V-24V 350mA constant current LED driver in a plastic-house with a built-in touch dimmer.

A 12V-24V 350mA constant current LED driver in a plastic-house with a built-in touch dimmer. Draws 350mA LEDs 1-3 v. 12V and 1-6 diodes v. 24V.

The touch-sensor works by your touch on the plastic-house on the opposite end of the power-plug.

The diodes in sequence are to be connected to the connectors of the LED + and the LED inside the plastic houses, through the piping hole opposite of the power plug.
