Prostrobe Multi-Flare - 6 x turtles in Charging case

A toolbox with 6 compact LED warning lamps/turtles with an extra white-light function.

Our multi flares with their powerful plastic-housing work perfectly for warning lights, where they can be layed on the road. The lamps have a powerful magnet built in and can be put directly on your car, truck, motorcycle and trailer. There is also a ring for hanging the lamp with a rope or similar.

The all-new Pro version has 8 powerful white LEDs built in, so it can be used as a flash-light or an extra marking-light.

The lamps contain rechargeable batteries that hold for approx. 17 hours of operation, completely depending on the selected function. They can all recharged by simply being put back in the suitcase. It can charge all 6 lights at once, either via the supplied 230V transformer or via the supplied cigarette-socket. You can connect it to both car and truck, 12V/24V. The suitcase has LED-indicators and shows when the lights are fully charged.

The lamps have 9 different functions with different operating times.
