2 x 3 mm RC Diodes in Parts 6-9 volt

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. a techflex, mounting frames, a wire and assembly instructions.

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. a techflex, mounting frames, a wire and assembly instructions.

These diodes are particularly well-suited to the headlights/fog lights as LEDs have a concentrated dispersion and a high brightness. The diodes have a diffuse/white lens.

Depending on the connection you want, you can find different connectors, switches, batteries and battery holders under RC-Accessories.

Buy online at:

Blue
SKU 130401
Operation Voltage: 6-9V @ 20mA
Color: Blue
Lens type: Diffuse
Light Scattering: 120 °
Brightness: 1000mCD
Wave Length: ~ 470nm

Red
SKU 130411
Operation Voltage: 6-9V @ 20mA
Color: Red
Wave Length: ~ 625nm
Lens type: Diffuse
Light Scattering: 120 °
Brightness: 1000mCD

Yellow
SKU 130421
Operation Voltage: 6-9V @ 20mA
Lens type: Clear glass
Wave Length: ~ 589nm
Light Scattering: 30 °
Brightness: 3500 mcd
Color: Yellow

Green
SKU 130431
Color: Green
Brightness: 1300 mcd
Light Scattering: 120 °
Wave Length: ~ 525nm
Lens type: Diffuse
Operation Voltage: 6-9V @ 20mA

White
SKU 130451
Light Scattering: 120 °
Lens type: Diffuse
Operation Voltage: 6-9V @ 20mA
Color: White 7000K
Brightness: 1100 mcd
Wave Length: X =-Y = 0.31 0.32
