BA15S, 12 x Led, 24V (5 Watt)

12 powerful yellow LEDs. Used for the turn signals. The diameter of the bulb is 25 mm.

12 powerful LEDs. Used for the turn signals. The diameter of the bulb is 25 mm. Switching the turn signals bulb with a LED bulb, the light will be blinking faster than usual. You will therefore need to use these ' cheat bulbs ', which use the power of a regular bulb. The resistors will be connected to the + and – the approach to turn signals bulb.

Note that the brightness is not quite as powerful as a regular 21W bulb.

41 mm long (measured from the pole to the diode peak).
REF. no: 1156, 382, 13821, R5W, R10W, 24V
