LED Strip, 50cm - 24V

A flexible SMD stripe in continuous lengths up to 5 metres.

The SMD-tape can be shortened or extended further, so it fits for your project. The stripe is built up in small modules of 10 cm, where there are 6 powerful SMD diodes in a circuit ready for 24 ~ 28Vdc. There are clear markers, where the stripe can be cut, as well as solder-islands, where you can solder wires or you can extend with more SMD-tape. On the back, there is a powerful 3 m tape, which means that the SMD-tape will be sitting on his seat without screws.

It is sold in units of 50 cm, but it can be supplied in coils up to 5 metres, for example, if you are ordering 5 x 50 cm, you will get it in a long piece on 250cm and then you can even shorten it up/extend it, so it fits for the task.

The LED stripe can also be dimmed in the brightness via our 24Vdc dimmers
