Diode Bulb nr. 3 X 6

LED bulb with 3/5 Watt socket on the PCB is a super strong 10 mm diode with a very wide light scattering.

LED bulb with 3/5 Watt socket - a new and more powerful version with a flow regulator, so that it adapts itself to your particular car. Thus, it is protected, for example from a high charging voltage. On the PCB is a super strong 10 mm diode with a very wide light scattering.

Is often used in Opel, Nissan, Mercedes, Mazda and Toyota.

Dimensions:

Base/Socket: 2 x 9 mm
Total: ø10 x 29 mm

Ref. no: W3W W5W, 501, 194, T10, 12256, 12961, 12V, 316, 329, 336, 346

May not be used in headlights because heat can destroy the diode!!
