Prostrobe Controller - 4A - 12V & 24V

A powerful professoinal strobe-controller that works with all LED products. A fixed program makes all connected markings, lamps and bulbs to flash simultaneously.

A powerful professoinal strobe-controller that works with all LED products, both car / 12V and truck / 24V. It has one program, where the lights flash shortly three times.

The controller is encapsulated in a compact and sturdy aluminum cabinet that is IP65, IEC529 and NEMA4 approved. There is a 2 metres cable for both input and output.

The controller is very easy to connect with one cable for input and one cable for output. With one function, you can be sure it works properly, every time. The mounting holes are hidden inside the cabinet under the lid.

The controller is also available with M8 connectors for machine factories and builders or can be ordered to be made with larger quantities.
