LED Stripes, RGB, Splashproof, 5 metres - 12V

RGB stripe in flexible plastic, making the stripe splashproof.

Splash proof LED stripes with powerful RGB LEDs. The splashproof stripes are sold in 5 metres rolls, but they can be shortened or extended,according to your need.

The stripe is 10mm wide and is made of small 10cm intervals, that each have 3 RGB LEDs. It is clearly marked where you can cut off an interval and there are solderpads in between, so you can solder new wires on.

3m tape on the back makes it easy to tape it on most surfaces, except on wood!
