Connector for Single-Color Stripes

It is used to easily connect two LED stripes together. A quick alternative to soldering the stripes together.

The connectors are used for connecting easily two LED stripes together. They are a quick alternative to soldering the stripes together. Available as extension-connectors or angle-connectors.

There are markings on the connectors, so you can see how the stripes should be connected. If you do not connect them correctly the stripes will not light up.

Notice that these connectors only fit for striplights with 30 og 60 leds pr meter. Mostly these connectors is to big to fit inside the alumiums profiles.
