Connector for RGB Stripes

Used for connecting two RGB stripes. The stripes are simply pushed in to the connector.

The connectors are used to connect two or more RGB stripes in a longer chain. The stripes are simply pushed in to the connector. The connector is available as a straight model or an angle-model.

With the markings on the connectors it is easy to assemble them correctly.

Notice that these connectors do not fit splashproof stripes.
Mostly these connectors is to big to fit inside the alumiums profiles.
