Wireless RGB + White Controller - 12V & 24V

A wireless and a compact RGBW controller that can control RGB+White products, such as stripes. A touch-remote with color wheel.

A wireless and a compact RGBW controller that can control RGB + White products, such as RGB + white light stripes.

You can choose quickly and easyly a color on the remote's color wheel, where you can also choose from 15 different effects.

The controller has a built-in memory, so in case of a power failure the controller will automatically start up again in the same program.

It comes with no power supply, as it depends on how many devices are attached to the controller.

Programs:

- Fast color (speed not adjustable)
- Solid white color (speed not adjustable)
- Fast color and white (speed not adjustable) - Select color on wheels
- Any color change (no white)
- Four colors changing liquid
- Four colors change quickly
- Seven color change (white)
- Red - White color change quickly
- Blue - White color change quickly
- Green - White color change quickly
- Red flashing
- Blue flashing
- Green flashing
- White flashes
- All functions change

The remote has a range of 30 m (2.4GHz) and uses 2. AAA batteries. (Not included)

Connection

There are both the DC plug and the screw terminals at the entrance. At the end there is one screw terminal per channel and a common plus.

Includes a sheet of a double-sided tape to attach the controller.
