LED Stary Sky, 150 pcs. 1 mm fibers, 5W RGB

RGB fiber light stary sky with 5W RGB LED as a light source. The fibers are 2 metres long.

RGB fiber light stary sky with 5W RGB LED as a light source. The fibers are 2 metres long. With the remote, you can change the color, the brightness and the effect-function. The emitter remembers the settings if turned off and on again.

LED emitters for fiber-light use much less power and are also stronger than the halogen-emitters.

The 150 fibers have a diameter of 1mm and are 2 metres long.

The emitter is supplied with a 230V to 12V adapter. An English manual is included.

It can also be used for a direct connection to 12V DC, by ordering a male DC plug (2.1mm).
