LED triangular trailer lamp with licenseplate-light, 12 - 24V

A multi-function lamp with a triangle reflector, tail and brake lights, a turn signal and a number plate light.

A good-looking and practical multi-function lamp for both 12V and 24V with a triangle reflector, tail and brake lights, a turn signal and a number plate light. Two of these lamps are enough for a trailer. The lamp is E-appoved.

Two spacers are included for the bolts on the back, so that you can lift 24mm from the mounting surface.

The lamp is easy to mount and connect. There is a 2 meter long cable on the lamp with 4 conductors:

- White: ground / minus
- Black: tail light and number plate light
- Red: brake light
- Green: turn signal
