Mi-Light RGB+White LED bulb

GU10 and E27 RGB+White bulbs that can light in colors and warm white. Remote, touch panel or Wifi / App.

Powerful RGB+White bulbs that can light in different colors and also in warm white light. It can be controlled by a wireless remote or with a smartphone or a tablet with a Wifi-bridge. The receiving distance is maximum 30 metres.

Zone-functions

You can group the Mi-Light products in zones, allowing you to make advanced light setups. A remote can control an infinite number of controllers and each controller can register up to 4 remotes.

The brightness can be set from 1%-100% and the colors can be set in 255 steps.

Touch panel

Nice and elegant touch control-panel for managing your Mi-Light RGB and RGB+White controllers and bulbs. The control panel makes it easy to turn on and off, adjusting color, brightness and effect-mode in 4 different zones.

The panel is tempered glass, which gives the control panel a luxurious look.

The built-in wireless transmitter has a 30 meter range. The model with 2 x AAA battery requires no connection, and can be screwed or taped on. A piece of double-adhesive tape is included.

Wifi Bridge

A wireless bridge that makes it possible to use your smartphone or tablet as a remote for Mi-Light controllers and Mi-Light bulbs, both for dimming-products, RGB products and RGB+White products.

The bridge can control an infinite number of controllers. There is also built-in 4 zones functions that the controllers can be grouped in. The range of the wireless bridge is 30 meters. It is supplied with a micro-usb remote (not included).

We recommend that you try to install the app on your unit before you purchase, so that you can check the compatibility: Download app for Apple-units - Download app for Android-units

Wall holder

The holder is fastened on the wall and then the remote control has its own parking space. The remote control can be easily loosened from the holder, so it is not a permanent attachment.

Registering remotes

To register a remote to the bulb, you turn the bulb off, then turn it on again. Within 3 seconds you must push the wanted zone-button. The light will then flash 3 times to confirm. To unregister - you do the same, you must push and hold the zone-button until the lights flash 9 times.
