Socket for G9

Socket for G9 bulbs. The cables are put in to the holes in the base, where after the cover is clicked on.

Socket for G9 bulbs. The cables are put in to the holes in the base, where after the cover is clicked on.

There is a M10 thread on the bottom for mounting the socket.

If the socket should be hanged down, you would need also a cable strain relief.
The outside diameter is 22 mm.
