Serie 20 - Inside angle bracket

A smart bracket that is mounted inside the profiles. Easily tightened with a unbraco key.

A smart bracket that is mounted inside the profiles. Easily tightened with a unbraco key.

Typically these are available in to models, depending on where the profile is to be set. This model is universal as it supports both ways.

The bracket should not be used in joints where a high mechanical stability is needed. For this you should use regular angle brackets or flat brackets.
