Rubber end for fiber lights

End for holding a fiber to a certain place, ceilings, etc. It is being pushed in to a 4mm hole, where after the fiber can be put in.

End for holding a fiber to a certain place, ceilings, etc. It is being pushed in to a 4mm hole, where after the fiber can be put in.

It might still be an advantage to use glue, as the fiber can fall out of the end, if you pull enough.
