WAGO 221 connectors

WAGO' 221 series is the newest connector with levers. 40% smaller, transparent and has levers that are much easier to use.

WAGO' 221 series is newest connector with levers. 40% smaller, transparent and has levers that are much easier to use.

It is very easy to see if the wires are correctly fastened, as you can see them through the transparent housing, which was not possible in the old Wago 222 series.

The 221 connectors can handle wires from 0.2 til 4mm^2, they just have to be stripped 11mm.
