LED Strip, RGB, Splashproof, 5 m - 12V

RGB stripe for 24V, encapsulated in a plastic, making the stripe splash-proof.

LED stripe for 24V with very bright RGB LEDs encapsulated in a plastic, making the stripe splashproof. The stripe is sold in spools of 5 metres, but you can shorten it and/or extend it yourself.

The stripe is 10mm wide and made of smaller 10cm long circuits. You can cut these circuits at the markings on the stripe, where you can also solder new wires on.

There is 3m tape on the back side, so you can tape it on.

It is not possible to mount on uneven surfaces or wood!
