RGB+White LED Strip, Splashproof, 5m - 12V

A powerful LED stripe with RGBW LEDs, covered by a layer of rubber, that protects the stripe. It can emit both RGB and a warm white light.

A powerful LED stripe with special RGBW LEDs, that can emit both red, green and blue and also a warm white light. By combinating the 4 colors, it is possible to make completely new color-combinations, not possible with RGB, such as light blue, light purple etc.

The splash-proof stripe is covered by a layer of rubber that protects the stripe against splash and touch.
