Poppy LED Lamp, 12 - 24V

A flat LED lamp for lighting up your Poppy air fresheners. 5 powerful LEDs make the poppy-lamp glow with a nice even light. Red, white, green, blue, orange and RGB. With cigar-plug or USB.

A flat LED lamp with a cigar-plug, USB or straight wire for lighting up your Poppy air fresheners. 5 powerful LEDs make the poppy-lamp glow with a nice even light.

DO NOT CUT ANY WIRES / PLUGS!

Colors

The lamp is available as single-color or RGB.

The lamp is available in red, white, green, orange, and RGB. A colored model will simply make all Poppy models light in the same color or mix with the color, while the white lamp will just make a yellow bottle glow yellow etc.

With the RGB model you can change between the light color and effects, such as color-changing and flashing, all selected with the controller that is mounted on the wire.

Mounting and connecting

The lamp can be connected to both 12V and 24V.

The lamp is available with single or double connection. With a single connection, you get 1 lamp with 1 of the chosen power supplies. With a double connection, you get 2 lamps with 1 shared of the selected power supply. The lamp is also available with wire (+/-) for direct connection at 12V or 24V.

There is a 90cm wire on the lamp - THE USB/CIGAR PLUG MUST NOT BE REMOVED / CUT!!! There is a voltage regulator in the cigar plug that cannot be omitted. Additionally, we also have USB plug for direct connection.

The double-sided tape on the bottom and top of the lamp makes it easy to install; simply stick the lamp onto a table or similar, and then attach the Poppy bottle on top.

Extra tape

The extra tape can be used if you move the base, or replace the Poppy, and the tape will not hold any more.
