Zig Zag LED Stripe - 12V - 50cm

A smart LED stripe that can be bended / zig-zagged in angles up to 90 degrees. It is perfect for lighting around edges and corners.

Normal LED stripes can be bended, but these new LED stripes can also be twisted / zig-zagged up to 90 degree angle. This gives you completely new possiblities in regards to backlighting of edges and corners.

The stripe is sold in 50cm intervals and can be delivered in spools up to 5 metre lengths. If you buy 5pcs., you will receive 5 x 50cm, total 250cm. You can then split up the stripe as needed.

The Zig-zag stripes are an obvious choice for background-lighting of logos, graphics and signs, where there are round and irregular shapes.

There is a double-adhesive tape on the back of the stripe, which makes it easy to mount. We recommend extra glue where you bend the stripe, so you will secure it properly.
