230V Track Light - Profile - 2 metres

2-phase profile that is the primary building-element of a profile-system.

2-phase profile that is the primary building-element of a profile-system. The profile is 2 metres long and can easily be cut in to shorter lengths with a standard circular saw.

There are two conductors in the track and a ground-track on one of the sides. The two conductors are embedded in plastic, securing the insides of the track against shock.

There are 3 screws and raw plugs for mounting the track.
