230V Track Light - Middle-connector

A joint for two tracks with inside screw-terminals for connecting the profiles to 230V.

A joint for two tracks with inside screw-terminals for connecting the profiles to 230V. The two ends are pre-connected with cables and so this part can also be used as a simple joint.

It is possible to feed the cable through the backside and the holes for screwing it on walls or ceilings.

The dimensions are without pins.
