Stainless IP67 LED Indikator

LED indicator for 12V or 24V that can be used as indicator for outdoor use. The housing is A4 stainless steel and it is completely waterproof on the front.

LED lamps for 12V or 24V that can be used as indicators for outdoor use. The special lens in the front give you a larger light-surface that ensures that it can be seen over distance as well.

The housing is A4 stainless steel and it is completely waterproof. A2 stainless nut is included. The head has a diameter of 9,8mm and it must be mounted in a 8mm hole. There is a 15mm thread for mounting it, as well as a 1 meter cable.

A lock-nut is included and also a gasket for making a water-proof panel-mount.

Their consumption is 0,4W
