# LED Indicator in metal - 10mm, IP67

An indicator in nickel-plated brass with a white or colored LED light and a large diffuse lens. It is available for 12V DC, 24V DC and 230V AC

An indicator in nickel-plated brass with blue, red, yellow, green and white LED light. A large diffuse lens gives you a clearly visible light with a wide beam. This indicator is very unique with its flush head and the large colored glass, especially in this price class.

The indicator is available for 12V DC, 24V DC and 230V AC, so make sure to pick the right voltage.

The head is 10mm wide, and it is mounted in a 8mm hole. A gasket is included for waterproof panel mount, as well as a lock-washer and nuts for mounting it. There is a 20cm wire for connecting it.
