LED Light Chain with a Warm White Light - 230V

230V LED light chain for indoor and outdoor. With 180 LEDs - 14M or 240 - 24M LEDs.

LED light chain for indoor and outdoor use. With 180 or 240 LEDs which provide a beautiful warm white light.

The length of the chains pertains to the section where the lights are mounted. For the model with 180 LEDs, they are distributed over 14 meters. Additionally, the connection cable is 5 meters, resulting in a total of 19 meters.

The many 5mm LEDs have special side-emitting lenses, which provide light both forward and sideways, giving them a glow like incandescent bulbs.

The light chain connects to 230V via the included transformer. The light chain has a dark green cable.
