Door switch in black, Max 2A - 250V

A simple switch that can be activated when a door or drawer is being opened. To be mounted under a shelf or on a wall.

A simple switch that can be activated when a door or drawer is being opened.

It can be mounted under a shelf or on a wall, so that the switch can be pressed when the door or the shelf are closed. When opened, the switch comes out and the power is turned on.

It is very easy to connect with screw-terminals inside the switch.
