Matronics Neon toplamper til Volvo 2012+ - Type I

Complete position light sets for Volvo FH Globetrotter/XL: two bases and Neon lights. Dual color models switch between yellow/white light.

Complete set of position lights (right + left) that fit in the top corners of Volvo FH Globetrotter and Globetrotter XL, on models without top beam lights. The sets consist of two plastic bases and matching Matronics Neon marker lights.

The lights are screwed onto the base with the included bolts and nuts. The original light is disconnected and removed, and the new light is clicked on and connected. Suitable connectors are not included, but standard 2.8x0.8mm male terminals can be used, or the original connector can be cut off. The neon lamps come with 1 meter of wiring.

Dual color models

The dual color corner lamps can switch between yellow and white light by swapping the plus and minus connections. This will require modifications to the wiring system and can be controlled with a color change controller or a 2-pole switch.
