Touch dæmper i silver plast, 12-24V 2A

A touch switch for 12 ~ 24Vdc 2A, a 15 cm cable with a DC connector.

A touch switch for 12V and 24V with a max current of 2A. The switch has no moving parts, but it is being activated when it senses it is being touched.

With a short touch you turn it on and off. With a long touch you can dim the output up and down. The switch can be used for dimming LEDs, LED stripes and other lights, where there is no other controller.

There is loose wires on the sensor. It is mounted by pressing or gluing it in a 18mm hole.
