BA15YD Canbus, 28x LED, 10-30V, White/Yellow

For american cars that use a single BA15YD bulb for both running lights and indicators. This one is giving a yellow light when the indicators are on.

For american cars that use a single BA15YD bulb for both running lights and indicators. This one is giving a yellow light when the indicators are on.

There are 21 powerful white, and 7 powerful yellow LEDs, but the bulb only uses one color at a time. Each color uses 4,2W.

With the built-in voltage regulator, you can use it for both 12V and 24V.

Because of the low power-consumption, it might be necessary to use cheat resistors in cars with bulb-control / canbus.
