Voltage Regulator 3V-40V Input, 1.3V-35V Output - 2A

A smart compact voltage-regulator that adjusts the input voltage down to the wanted output voltage.

A smart compact voltage-regulator that adjusts the input voltage down to the wanted output voltage.

You connect it by soldering cables on the input and on the output, which are marked with IN and OUT.

The output voltage can be adjusted by dialing the blue potentiometer with a fitting screwdriver. You should measure the output-voltage before connecting anything.
