LED rear lamp, round with a reflector, 12 - 24V

A nice and sturdy LED rear lamp with 30 LEDs in three models. A solid construction and with a 5-years waranty from the manufacturer. ECE-approved.

A nice and sturdy LED rear lamp with 30 LEDs in three models. The lamp is available in three models:

- Tail lamp with tail lights, brake lights and turn signals
- Tail lamp with reverse lights
- Tail lamp with fog lights

All models also have a reflex in the middle of the lamp.

The lamp is very sturdy, which is also why it has a 5-years waranty from the manufacturer. The hardened acrylic glass secures the lamp against shocks and impacts. It is also very resistant to chemicals and it has extra UV protection.

The electronics in the lamp are completely potted and the housing is IP67. Because of this, it can be fully submerged without problems, for example on a boat trailer.

The lamps are of course ECE-approved and EMC-approved.
