LED mini combination lamp 12 - 24V

A tail, a brake, an indicator lamp for 12V and 24V. A completely waterproof and sturdy design. A lifetime warranty

A nice and simple combination tail lamp for 12V and 24V that only has measurement of 10 x 10cm. The lamp has a tail light, a brake light, an indicator light and a built-in reflector.

With the plug on the back you can connect a matching LED license plate lamp. Look under accessories on this page.

A completely waterproof and sturdy design that allows the lamp to be completely immersed in water. The electronics are potted, which means they are protected against vibrations, impacts and heat. The glas is very durable and built to last, when mounted on commercial vehicles.

It has been thoroughly tested, which is the reason for the manufacturer issuing a lifetime waranty on the lamp.

The lamp is ECE and EMC approved.
