Touch Switch with Dimming and DC Plugs, 12~24VDC 4A

Compact switch witha touch-activation and with a built-in dimmer. For both 12V and 24V.

Touch switch for 12V and 24V with a max. current of 3A. 15cm wires with a DC female plug (2.1mm). The switch has no moving parts, but it is being activated when it senses it is being touched. The switch is pushed in to a 18mm hole, while the switch head is 22mm in diamter.

With a short touch you turn it on and off. With a long touch you can dim the output up and down. The switch can be used for dimming LEDs, LED stripes and other lights, where there is no other controller.
