230V Eltako Dimmer, 100W LED

A smart digital dimmer that can be mounted on rail. A higher output is easily achieved by connecting more extension modules.

A smart digital dimmer that can be mounted on rail. A higher output is easily achieved by connecting more extension modules, that can both be connected parallel with the main module or by coupling them as individual groups controlled by the main module.

The main module has a display for showing the dimming, but is also used for setting it up using the two buttons. There is a lot of features and settings - damping character, night setback, min / max, etc.

The dimmer can dim broadly all types of light / LED.

When there is LED and CFLs - max. 100W
When there is incandescent bulbs, as well as CR and LR, the max power is 400W.
