RGB + WW LED Strip, Splash-proof, 5m - 24V

A splash-proof LED light stripe with RGBW LEDs for 24V. It can give both RGB and a warm white light.

24V LED light stripe with special splash-proof RGBW LEDs. The LED stripe can light red, green and blue, as well as warm white. By combining the 4 colors, you can create new color combinations that are not possible with only RGB. For example, you can create light blue, light purple, etc.

The splash-proof tape is covered by a layer of rubber that protects the tape against splashes and hits, but it is not completely waterproof.
