Topmet Arc 12 LED profile

A flat and flexible alu-profile and an arc front. Both parts can be bent and twisted, so they can be mounted in arches.

A flat and flexible alu-profile and an arc front. Both parts can be bent and twisted, so they can be mounted in arches.

There are 2 clips included for the 1 meter profile, and 4 clips for the 2 meter. As the profile is completely flat, it can also be screwed or glued on, which can be an advantage when it needs to be bent when mounted.
