Ribbon cable - 0,25mm²

Flat cable that can be used for LED light stripes. There is one line for each color and one line for a common plus.

Wire / flat cable that can be used for LED light stripes. There is one line for each color and one line for a common plus.

It is easily soldered onto the soldering points of a LED light stripe, and the color order applies to our typical stripes.

The flat cable helps to avoid mess in the individual wires during instalation. The cable can be folded once, if it must be passed through holes etc.
