230V ~ 12VDC RGB Transformer with WIFI, 6.250mA - 75W

Powersupply and color-controller in one unit. Saves space and is a cheaper solution. Controlled with iPhone and Android.

Compact powersupply and a color-controller, combined in to one unit. The unit saves space and is a cheaper solution, as you do not have to purchase these devices seperatly. The device is controlled with iPhone and Android, and it has many functions built in to the app.

- Controlling multiple units in one app
- Step-less adjustment of colors and brightness
- Scene-functions
- Sound-controlled colors
- Automatic on/off timer

The device is plug & play, the only thing you need to connect is the LED strip. The last thing you need to do is to install the app on the mobile or tablet.
