LED Industrial light / lamp, 4000K - 230V

Powerful LED luminaires of 100W, 150W and 200W that can replace the traditional ones.

Powerful LED luminaires of 100W, 150W and 200W, which gives respectively 13000lm, 19000lm and 26000lm. They are designed to be hung in barns, halls, warehouses, parking garages and other large buildings, where lighting is required in larger areas.

The advantages of LED luminaire versus sodium mercury lamps are that there is no heat-up time and the power consumption is only one third, compared to the light output.

The lamps are CE, RoHS, IK09, ENEC, CB, UL, DLC, PSE, SAA, FCC certified and can therefore be hung over everything.

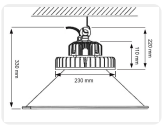

The light source is LEDs from Philips Lumileds and the driver is from MEAN WELL Taiwan, which ensures high light quality and long lifetime.

The lamp is typically secured with a wire or a chain from the ceiling and can be connected directly to 230V. With 1,8m cable.

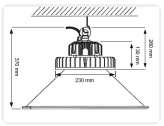

Includes lampshades with 120 degree light scattering.
