Clip-on probe with 4mm socket

Smart probe for clipping on wires or components on a circuit.

Smart probe for clipping on wires or components on a circuit. The clamp opens when you push in the end, where after you can put the wire in and then release. The wire will then sit securely clamped.

The socket for the cable sits angled on the side of the probe.

Max 8A

EN61010 1000V CAT II
