Serie 20 - Flat bracket

Flat bracket that is mounted on the outside of two profiles. The bracket is annodized aluminium and gives you a powerful joint.

Flat bracket for M5 bolts, that is mounted on the outside of two profiles. The bracket is 4mm annodized aluminium and gives you a powerful joint. If you need a extra solid joint you can mount the bracket on both sides.

Notice that one variant is painted steel, and will be discontinued when sold out.
