M6 bolt with unbrako head

Standard bolt with unbraco head in various lengths, all with M6 thread.

Standard bolt with unbraco head in various lengths, all with M6 thread.

The tall head on the bolt ensures that the unbraco key does not cam out and ruin the bolt. This allows you to tighten the bolt with large force.

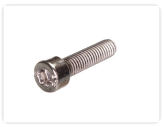

When you need to make very high strength assemblies, these bolts are prefered. In some brackets the large head can be a challenge.
