Serie 40 - Large angle bracket

Extra large brackets in cast aluminium that gives you extra stiffness compared to standard bracket. Mounted with 4 bolts.

Extra large brackets in cast aluminium that gives you extra stiffness compared to standard bracket. Great for larger constructions, where they will typically be used for the base frame, that requires higher strength.

The bracket is easily mounted with bolts. The larger model needs 4 x M8 x 16mm bolts, while the small one needs 4 x M6 x 16mm.

The bracket has only 1 wall, which makes it easy to access the bolts.
