Double adhesive foam tape, TESA 4957

Strong PE foam-tape with acrylic glue on both sides, usable for indoor and outdoor and indoor. Resistant to water and UV.

Strong PE foam-tape with acrylic glue on both sides, usable for indoor and outdoor and indoor. The tape is resistant to water and UV, and has a long lifetime. It has a great adhesiveness on most materials.

The tape is 1.1mm thick

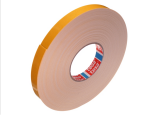

The construction compensates for the thermal expansions of different materials.

The tape can be used on displays, cable channels, trimmings, glasses, mirrors etc.

See the datasheet for a complete overview of the adhesiveness on different materials.
