LED signal lamp with buzzer - 24V

Compact signal tower lamp with 3 status colors and built-in buzzer. Can be used for machines, room and other purposes.

Compact LED signal tower lamp on tiltable arm, with the 3 typical status colors and built-in buzzer. The lamp can be used for machines, rooms and other purposes, where it might be necessary to show status, warnings or similar.

Colors and buzzers are activated by connecting these to 24V, eg. by using a switch, relay or 24V signal from a control-unit in a machine.

The light from the lamp is visible 360 degrees, and the buzzer is 85dB. The lamp is made of white plastic and aluminium.
