BAY15D, 13xSMD LED pære, 10-30V, Warm white, 1142

BAY15D / 1142 marine LED bulb with 13 pcs. powerful SMD diodes.

BAY15D marine LED bulb with 5050 SMD diodes, which together make 160 lumen. The bulb can replace a 10 ~ 15 watt incandescent bulb and the 3000K Warm color makes the bulb suitable for all kind of lighting.

The bulb has a built-in voltage regulator, so it works on the 10 ~ 30 Vdc without being demaged by the charging voltage etc.

NOTE: This light bulb is for "marine lamps", where there are + and - at the bottom, so this light bulb does not have 2 levels of intensity.
Legs/dots on the side of the synthesis are NOT sitting across from each other.
